

Frontline First Aid
Lesson Plan Example – Knowledge Presentation

Lesson Planned Signs & Symptoms of Diabetic Emergencies

Total Time: 5 minutes

Objectives

1. Familiarize students with some of the most common signs and symptoms of Diabetes
2. Give students the tools to recognize a potential Diabetic Emergency
3. Give students the opportunity to practice differentiating Diabetic Signs & Symptoms from other common medical emergencies.

Evaluation Criteria

Students will be given pre-made cards with Signs & Symptoms from a variety of medical emergencies. Using their manuals, students will organize the cards...isolating those related specifically to Diabetes from the others. An answer key will be used to check for accuracy.

Topic	Activity	Time	Resources
Lesson Objectives	Review objectives identified above	1 minute	Student Manuals
Signs & Symptoms of Diabetes	Mix and Match Cards as outlined above	2 minutes	Mix & Match Cards Student Manuals
Review	Check the accuracy of the Signs & Symptoms card placement	1 minute	Laminated Answer Key
Questions	Instructor answers questions regarding the information...referring students to their Manuals whenever possible	1 minute	Student Manual
